Our Services

IVC is a System Integrator and is involved in System Engineering, Design, Installation and Commissioning of Video Communication Systems & Surveillance Systems. The company is committed to offer state-of-art electronic security equipments to Indian customers with the best price performance ratio. After the acceptance of order, the company ensures that there is no deviation from the commitment made to the customer by adhering to the principle and discipline of

- Zero cost deviation
- Zero deviation from promised quality
- Zero deviation in delivery schedule

I.V. Communications (IVC) preaches Transparency and Integrity while dealing with its Clients besides day-to-day routine operation.

We Undertake: -

- I. Analysis of basic requirement of the client and Architects for various utilities.
- II. Discussion for the solutions as per the requirement in consultation with the Client and Architects.
- III. Site Visit through the Engineers to the Clients premises.
- IV. Preparation of: Preliminary Design, Preliminary Drawings, Preliminary cost estimates (for Study and Discussion). On approval of the preliminary Designs & preliminary drawings, the final drawings incorporating the comments of the client and architect are prepared.
- V. The sets of detailed drawings are submitted for approval together with Product specifications & detailed estimates.
- VI. Upon receipt of the approval/ comments on the detailed final drawings together with Product specification if required, the final cost estimates are submitted.
- VII. The supervision at appropriate level is determined taking into account the complexity of the work and the work is executed as per standards, specifications finalised with the clients. Quality checks are conducted before the work is completed as per the Commitment to the Clients and final handing over of the system is done.
- VIII. After the installation & commissioning, training is done for the clients operating staff.
- IX. Better relation with Parent Companies supplying various sub-systems ensures faster replacement of any component or any product.
- X. Complete service support and Technical support is provided during warranty period.

Medical Transcription Services

In addition to Electronic Security Systems, Company also has BPO activity and currently provides Medical Transcription Services.

This covers complete range of medical record documentation and management service to its professional client base in USA and UK. Our service provides a full control over the entire transcription process, both technical and non-technical; from dictation recording to audio file retrieval, from document production to quality control, from report generation to delivery of reports to the clients' systems. All these steps in the process are carried out in a data-secured environment.

Apart from document generation, IVC also provides audio as well as digital record management solutions to its clients.

Each report is processed by a workforce of well-trained and experienced professionals wherein utmost care is taken to meet all client-specific requirements while processing these reports. A team of well-experienced Quality Analysts is dedicated to handle any quality-related issues so as to maintain high standards of services provided.

IVC works on a TURN AROUND TIME of 4 hours to 24 hours depending on "AS REQUIRED BY THE CLIENT."
